

**LOW-LEAKAGE STEEL
DOOR, VARIANT ST-R/Z15**

Steel door with inspection window, pressure relief valve and cylinder rim lock (Profile cylinder on the opening side, cylinder rim lock on the closing side)

INSPECTION WINDOW

PRESSURE RELIEF VALVE

CYLINDER RIM LOCK

REMOVABLE FRONT
LOCKING LEVER (OF
DOUBLE LEVER LOCKING
DEVICE)

Z* – DOORS

FOR THE IMPROVEMENT AND EXTENSION OF THE RANGE OF APPLICATIONS

Attachments for low-leakage steel doors and inspection access doors to meet demanding requirements and extend the range of applications

- Cylinder rim lock to lock the door using either a rotary knob or a key
- Mortice lock, ready to accommodate a profile cylinder, to lock the door
- Double skin inspection window
- Pressure relief valve for pressure equalisation between the rooms on either side of the door; allows the door to be opened without much effort
- Double lever locking device with removable front locking lever; without the front lever the door cannot be opened from the outside
- Any combination of attachments for steel doors

TECHNICAL INFORMATION

Function

Arrangement of attachments for single leaf low-leakage steel door of Type ST

- ① Inspection window ($H < 1500$ at $H/2$)
- ② Pressure relief valve
- ③ Cylinder rim lock (profile cylinder side)

Right hinge

Any attachments are to be defined with the order code of low-leakage doors.

Z01

Application

- Used to lock the door and to manually open it from the inside

Parts and characteristics

- BKS rim lock
- BKS cylinder with three keys
- For double leaf doors: two identical cylinders

Z02

Application

- Used to lock the door, ready to accommodate a profile cylinder

Parts and characteristics

- Mortice lock for profile cylinders (profil cylinder by others), 22 mm inside length, 35 mm outside length
- Profile cylinder, e.g. BKS no. 3100
- Two escutcheons

Z03

Application

- For the improvement and extension of the range of applications of low-leakage steel doors and inspection access doors

Parts and characteristics

- Double skin inspection window
- Fixed with clamping profiles

Z04

Application

- Used for manual equalisation between the rooms on either side of the door; allows the door to be opened without much effort

Parts and characteristics

- Pressure relief valve made of aluminium diecast
- Perimeter foam rubber seals on both sides
- Two star grips

Z05

Application

- Without the front lever the door cannot be opened from the outside

Parts and characteristics

- Double lever locking device with removable front locking lever
- Front locking lever made of aluminium diecast

- Fits square shafts
- One removable front locking lever per door
