TROX strengthens its competence in measurement and control technology

High-tech systems, precise control, energy efficiency, and smart processes - modern residential modern residential buildings and workplaces are becoming increasingly complex. TROX has therefore brought competent reinforcement for measurement and control technology on board.

"Buildings are becoming more and more complicated and so is the planning and control of ventilation technology. The best possible use of TROX ventilation systems is a matter close to our heart. And this is now supported by the takeover of Sommer MSR in terms of both technical support," says TROX Managing Director Wolfgang Hucek. "In this way we can guarantee that, despite the highest demands, every building that is ventilated with TROX remains a safe living space for people."

Christian Sommer, Managing Director of Sommer MSR GmbH, will continue to manage the company's fortunes and will also be included in the management of TROX HGI GmbH. In the future he will be in charge of the export business in the service sector. Sommer: "The employees of Sommer MSR GmbH and I are pleased to belong to an internationally renowned and future-oriented company like TROX and to be able to support the areas of system solutions and service with our expertise in the future."

Sommer MSR GmbH based in Graz, which will operate under the name of TROX SOMMER GmbH in the future, was founded in 1999 and implements cost-effective and energy-efficient complete solutions in the field of measurement, control and regulation technology for building complexes of all types and sizes. The company accompanies the entire life cycle of an MSR system - from planning, construction and assembly to commissioning, troubleshooting, repairs as well as modernization and maintenance.
